PROFESSIONAL SUMMARY

Full-Stack Developer with production experience shipping an OpenAI-powered feature on the live nclips.ai platform using Python, Django and REST APIs, plus HTML, CSS and JavaScript frontends. Skilled in API design, third-party API integration, database modelling, authentication, unit testing and documentation, and a collaborative problem-solver and clear communicator. BCA graduate (CGPA 8.5/10) and MCA candidate with projects spanning backend systems, machine learning and automation. Third-prize winner, AIGNITE 2026 web development competition.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, SQL
Web & Frameworks: Django, Flask, REST APIs, HTML, CSS, JSP
Backend: REST API Design and Integration, Django ORM, Authentication (hashed-password login), Database Design, API Security, Automated and Unit Testing
Databases: MySQL, SQLite, JDBC, Supabase
AI and ML: OpenAI API, scikit-learn, Pandas, KNN, Random Forest, Decision Tree, Model Evaluation (F1), Rule-Based NLU
Automation: ADB, scrcpy, pywinauto, Win32 API (ctypes), psutil, Web Speech API, pyttsx3, Pillow
Tools & Deployment: Git, GitHub, Cloudflare, AWS EC2, Agile, Code Review, Object-Oriented Programming

PROFESSIONAL EXPERIENCE

AI Software Developer Intern (Stipend-Based) May 2026 - Jul 2026
Inspite Technologies Pvt. Ltd., Kochi, Kerala, India (On-site)

- Developed and deployed a backend feature for nclips.ai's live production application, integrating OpenAI models through Python and Django REST endpoints to generate AI video content; shipped to real users via Cloudflare.
- Worked with the engineering team through the full development and release cycle.
- Debugged, tested and optimized production code using Git, code review and Agile workflows.

PROJECTS

JARVIS - Personal AI Desktop and Android Phone Control Agent 2026 (In Progress)
Python, Django, SQLite, REST APIs, ADB, scrcpy, pywinauto, psutil, Web Speech API, JavaScript

- Designed a backend with 39 Django routes and a web dashboard; a rule-based intent engine routes voice and text commands to phone, WhatsApp, system and web-search handlers, with every action audit-logged to SQLite.
- Developed an Android control module (1,700+ lines) using ADB over USB and Wi-Fi: device telemetry, wake/lock, app launching, touch and text input, screenshots, scrcpy mirroring and file transfer.
- Automated WhatsApp Desktop (pywinauto) and Android intents with a human confirmation step before any message is sent.
- Secured the system with shell-free subprocess calls, localhost-only API access, app allowlisting and /sdcard/-confined file operations; wrote 70+ automated tests with mock device backends and project documentation.

RainCast - ML-Powered Rainfall Prediction 2026
Python, Flask, scikit-learn, Pandas, Open-Meteo API, SQLite, JavaScript

- Built a Flask backend that integrates the Open-Meteo API to pull 90 days of weather data (12 variables) for any map location and serves next-day rainfall predictions to a JavaScript frontend.
- Trained KNN, Random Forest and Decision Tree models per request on a stratified 80/20 split, compared accuracy, precision, recall and F1, and auto-selected the best model by F1; implemented hashed-password authentication and per-user history in SQLite.

FloodWatch Kerala - Flood Early-Warning Platform 2026
Python, Django, OpenWeather API, SQLite, HTML, CSS, JavaScript

- Built a Django backend consuming the OpenWeather REST API for a real-time flood early-warning platform, with automated alerts, citizen photo report handling, an interactive flood map and an admin dashboard for shelter and rescue coordination.

EDUCATION

Master of Computer Applications (MCA), Saintgits College of Engineering, Kottayam Expected 2027
Bachelor of Computer Applications (BCA), St Berchmans College, Changanassery \| CGPA 8.5/10 2025
Higher Secondary (Computer Science), Lourdh Matha HSS, Pacha \| 92% 2022

ACHIEVEMENTS AND CERTIFICATIONS

- Third Prize, WEBXCELERATE, AIGNITE 2026 (inter-collegiate web development competition), Feb 2026
- NASA Space Apps Challenge 2025 (participant); Young Innovators Programme 8.0, K-DISC, Kerala, Oct-Dec 2025
- Udemy: Full-Stack Web Development Bootcamp (62 hrs); DevOps MasterClass with Docker, Kubernetes (76.5 hrs), Jul 2026
- Leadership and Team Effectiveness, NPTEL (Elite), IIT Roorkee; Digital Marketing, SWAYAM, IIM Bangalore, 2026
